Anti-Slip Rubber Material

Technical Datasheet¹

Material	Rubber width, made of granulated polyurethane rubber
Colour	Black, eventually with coloured spots
Measurement	On width of 1,60 meter – confection according to customer requirements
Specific weight:	Approx. 820 kg / m ³
Tolerances	According to DIN 7715-Class 5 P3 (+/-3%)
Thickness	Material thickness 8 mm
Friction / Adhesion in μ	>0,8 μ
Compression strength (30% deformation)	Approx. 3,15 N/mm ² Tested with test pattern 50 x 50 mm Qualified for heavy loads
Cold resistant	Approx. - 40 °C
Heat resistant	Approx. + 115 °C
Chemical resistance	Resistant against weak acids and base Oil resistant
Fire class (DIN 4102)	Passed B2

¹ subject to alterations
